

Tiniteqilaq's Qreevanqa

We call him Qree.

Because Qree is a large and strong Siberian Husky, he is working as a wheeldog.

In the team he runs next to his father Tiniteqilaq's Geir, who really has an excellent working attitude.

The eyes of Tiniteqilaq's Qreevanqa have been examined on eye-diseases.

The results are okay, he has no sign of eye diseases.

Siberian Husky Tiniteqilaq's Qreevanqa is 50% Polar Speed, 25% Vargevass and 25% Sepp-Alta.

Here below we explain why we did this combination in breeding.

Mother: Polar Speed Inca

The mother of Qree is Polar Speed Inca and his father is Tiniteqilaq's Geir.

We made this combination, because Polar Speed dogs are really good working dogs and Inca, the mother of Qree is still running in our A-team, she is the engine of our young team.

She can run in lead, however she mostly runs in the point-position. In her pedigree many leaddogs can be found.

Father: Tiniteqilaq's Geir

Geir, the father of Qree is for 50% out of the Vargevass breeding-line and for 50% out of successful Siberian Husky lines from the Netherlands. The mother of Geir, is called Chuk van de Beugelskamp and she gave us 3 litters. All of her children are really good lead-dogs. In the pedigree you can also find Hunter Sotokaya of Novaja Sibir, a leaddog from the best female musher that the Netherlands ever had. She is called Sonja van Laar and she has a lot of championships on her name. She used to be well known throughout Europe.

You also can find Anartjok's Laska on the pedigree. Anartjok was de kennel of John van Eijk, who was a well known Siberian Husky breeder and musher from the Netherlands as well. John van Eijk also has many championships on his name and during his days, his name was well known in de musher scene.

Results of this breeding

On 2nd March 2008 during the Belgium Championships in France, the French Musher Fabien Marmet won the Sprint race in the 4-Dog-Class. Fabien had the fastest time overall.

Tiniteqilaq's Qomet, who is a female littermate of Tiniteqilaq Qreevanqa was running in lead of this successful team.

We are happy with this result and can congratulate Fabien. The puppies out of this Q-litter went to in France, Norway, Sweden and the Netherlands.

Pedigree of Tiniteqilaq's Qreevanga

Date of birth: 21 September 2005

Date of Birth:
21-09-2005

N.H.S.B.nr:
2.576.427

Sex:
male

Owner:
Paul & Maya Brünner
